

Kairos Sturnus Radio Controller Binding Guide

1) Ensure all switches are in the disarmed state (**switches are away from you**) and the left thumb stick is pulled all the way down. Then Press and hold the center power button for 4 seconds until the controller vibrates

2) Briefly press the three-line **Menu** button

3) The **MODELSEL** menu appears on the controller display, and the menu page number "1/12" displays in the top right of the screen

4) Press the **Page** button once

5) The **SETUP** menu appears and the top right of the screen displays "2/12"

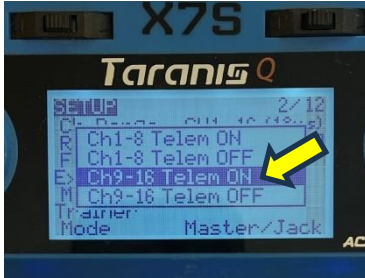

6) Spin the **Scroll dial** to scroll through page 2/12 and move the selection reticle (black blinking rectangle) to "[BND]" in the row labeled "RxNum."

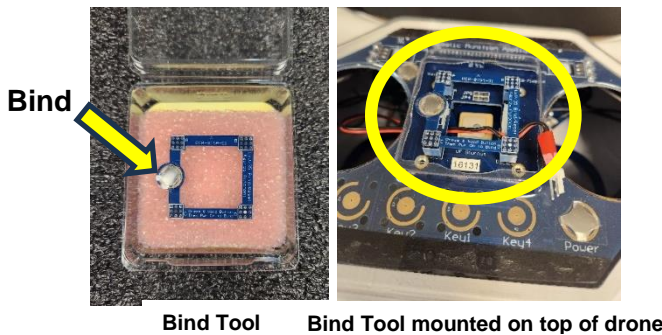

7) Press the **Scroll dial** and a sub-menu will appear. Scroll with the dial to "**Ch9-16 Telem On,**" then press the **Scroll dial** again

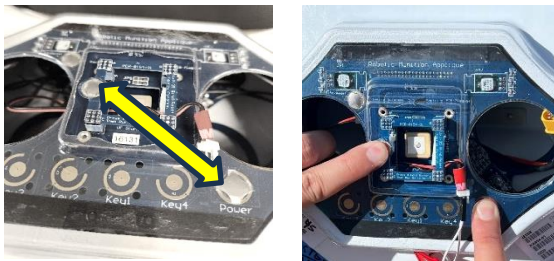

The channel list will disappear, and the controller will begin to beep.

8) Install the Bind tool onto the top of the powered off drone

9) Press and hold down the **Bind Tool** button and the drone's **Power** button at the same time for at least 10 seconds

10) After the drone is powered on for 10 seconds, release the **Bind tool button** and the drone's **Power** button

11) Press the **Exit** button on the controller three times to return to the controller's status display

12) Power off the drone by pressing and holding the **Power** button for 5 seconds

13) Carefully remove the **Bind tool**

14) Power on the drone again by pressing and holding the **Power** button for 5 seconds

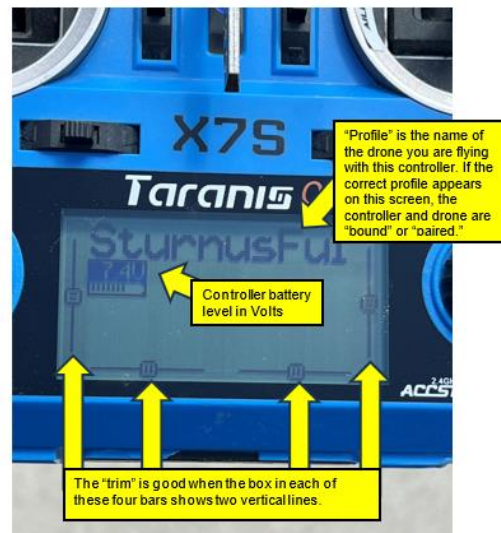

Once the drone finishes initializing, return to the controller status display.

15) Signal bars confirm that the controller sees the drone

16) Check the trims and profile

17) Check the controller battery is above 6 bars

18) Power off the drone by pressing and holding the power button for 5 seconds. When the drone is powered off all lights on the drone will turn off and the signal bars on the controller will go away

This completes the radio controller binding process for the Kairos Sturnus
